

# The Mechanical Bulls

Regal Eagle Roundtables

# Why Even Bother With Outreach?

FIRST: For Inspiration and Recognition of Science and Technology

- Team 810 prides itself on our attempts to incorporate FIRST's ideals into our volunteering and outreach efforts
  - Give back to the community
  - Immerse others into the world of STEM
  - We believe everybody deserves the chance to experience the world of FIRST
- And you can do it too!

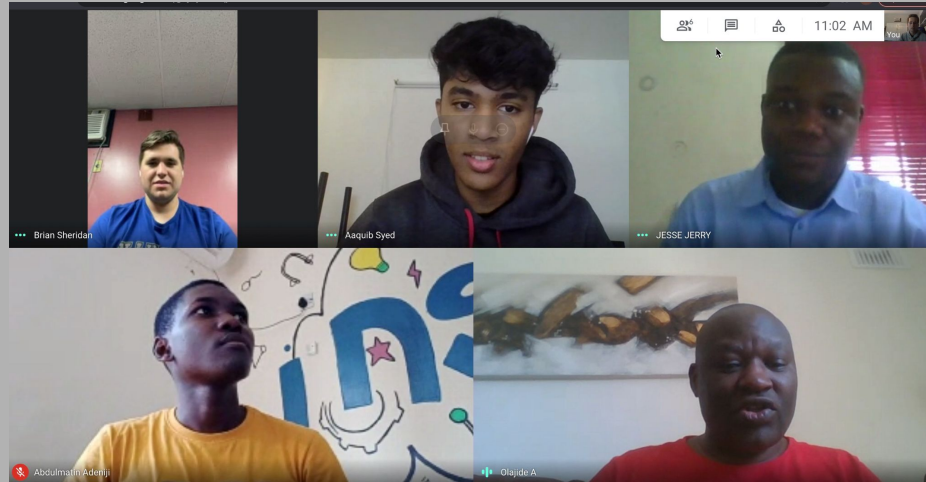

# How We Did It... and How You Can Too.

- [FLL mentoring]
- Contact local FLL team mentors. We contacted 3 at our local middle schools.
- Keep in touch! We invited them all to a Slack channel
- Set up dates and times (for us each time is a few days a week)
- Plan different members for each school. Consistency in members is key so the kids feel comfortable working.
- Have fun building and teaching!

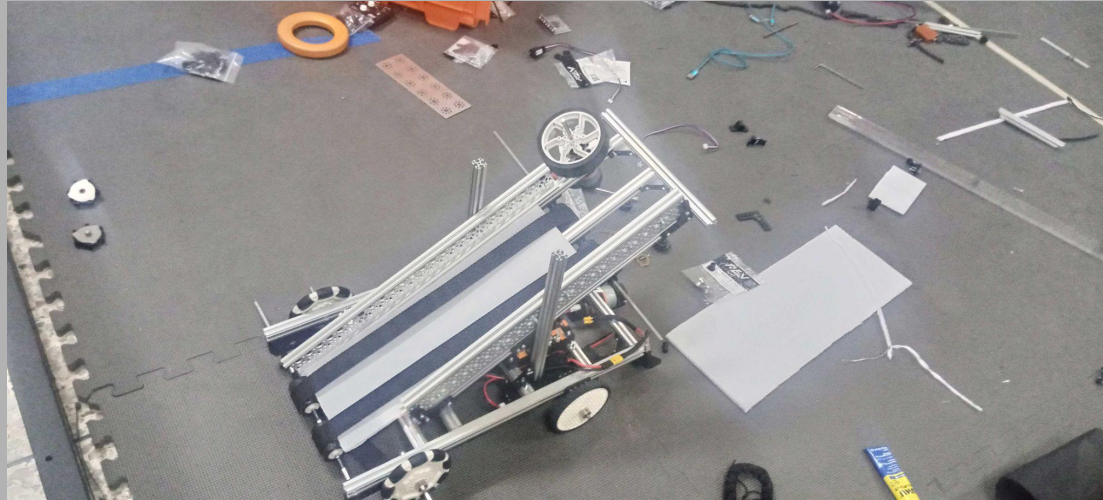

# How We Did It... and How You Can Too

- Contacted FIRST South Africa and asked what they needed help on
- Set up a meeting with the team at FIRST SA
- Utilized their connections to host group meetings
- Actively communicated with FIRST SA to host meetings with specific teams on a variety of different aspects

# Problems We Faced... And How We Solved Them

- Planning and Organization
- Time Zones
- Communication

# LIConnect: Creating a FIRST Community on Long Island

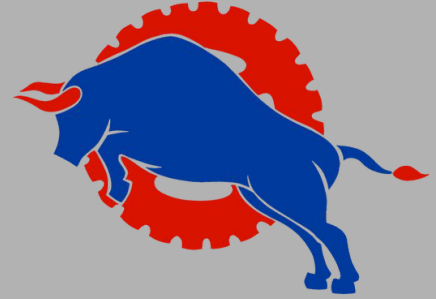

- Create an interconnected community
- Post questions during build season and advertise outreach
- We hope you all join our platform and connect with us!
